

## Metabolic Testing Preparation

---

### HOW TO PREPARE FOR YOUR METABOLIC TEST

- Fast for 8-12 hours prior to test time (no consumption of food or beverage except water)
- No exercise or strenuous activity 12 hours prior to test
- Try to remain relaxed during the 3 hours prior to your test
- Wear comfortable clothing to your test

### WHAT TO EXPECT:

Allow 20 minutes for your testing appointment

We'll also need to...

- Schedule your follow up consultation session within 1 week.

### What will take place during the testing session?

When you arrive at your scheduled time, you can expect to have a discussion with the technician in order to make sure that you fully understand the different tests and what will take place during the testing session. The metabolic test requires you to lay down and relax while breathing normally into a tube for 10-15 minutes.

### WHAT'S NEXT?: THE FOLLOW-UP CONSULT

During this session, we will go over the results of your testing and outline of your program and plan any other meeting times, etc.

Your best chance at improving your health is to **CREATE** a diet that works with your unique metabolism, not against it. There is no single diet that works for everyone.

***Forget about charts and averages - there is no such thing as one size fits all.***
